Subject: ENTACT - Remedial Construction (Gold King Mine Spill)

Hi Gina,

I reached out to last week regarding the Gold King Mine Site Cleanup.

As a reminder, ENTACT is a self-implementing remedial construction contractor. We have done several projects in Colorado. Some of our relevant skills sets include; sediment removal, water management and diversion, water treatment, and restoration. We have personnel and equipment ready to mobilize in the area, as well as a Conifer, Co office.

Filled out the comment box on the link you provided, but haven't heard back or had confirmation that it was received. Wanted to touch base to make sure that we are on your radar as a resource.

Sincerely,

John Bowsher
